BENCH-TOP PROTOCOLS for eCube Plasmid DNA Maxi Kit

eCube Plasmid DNA Maxi Kit

* Things to do before starting

- 1. Brief spin RNase A tube and add the RNase A to XPD1 Buffer and mix well.
- Store XPD1 Buffer at 2-8°C after adding RNase A.
- 2. If precipitates have formed in XPD2 Buffer, warm the buffer in 37°C waterbath to dissolve precipitates.
